## WORK EXPERIENCE

### Smart City Infrastructure Management System

- Collaborated in a team of 8 to build a full-stack system using MERN stack
- Developed "Event and Public Space Management" module with booking and reporting functionalities
- Integrated MongoDB to store and manage event data

### Online Banking System (Academic Project)

- Created JSP pages and servlet-based workflows for loan application and management • Connected to MySQL and used JDBC for data persistence
- Designed responsive UI using CSS and improved user experience

### ChoonPan Mobile App

- Developed a full-stack Choon Pan mobile application using Expo, React Native and Firebase, featuring integrated live map navigation and real-time location tracking, enabling buyers and drivers to track each other and optimize delivery routes.
- Implemented secure online payment processing with automated order confirmations to streamline transactions between buyers and sellers.
- Built an intuitive ordering system allowing buyers to place orders and sellers to efficiently manage deliveries in real time.

### Task Manager Mobile App

- Developed an Android task management application using Kotlin with a clean, intuitive UI for adding, updating, and deleting tasks.
- Integrated SQLite database for local data storage, ensuring offline functionality and data persistence.
- Implemented RecyclerView for efficient task listing and user-friendly task organization.
