PROFILE SUMMARY

Motivated and detail-oriented IT undergraduate with hands-on experience in building web and mobile applications. Skilled in Java, JavaScript, React, and Android development (Kotlin), with strong knowledge of full-stack development, database integration, and API-driven systems. Eager to contribute to software development teams by delivering scalable, user-focused solutions and writing clean, maintainable code.

TECHNICAL SKILLS

Programming Languages

- Java
- JavaScript
- Kotlin
- SQL

Frontend Development

- React
- HTML5
- CSS3
- Responsive UI Design

Backend Development

- Node.js (Express) – MERN Projects
- Java Servlets & JSP
- REST API Development

- JDBC

Mobile Development

- Android (Kotlin)
- React Native (Expo)

Databases & Cloud

- MySQL
- MongoDB
- Firebase
- SQLite

Tools & Practices

- Git & GitHub
- Agile Team Collaboration
- Debugging & Testing
- Version Control Best Practices

PROJECT EXPERIENCE

Smart City Infrastructure Management System (MERN Stack) | Aug 2024 – Nov 2024

Developer – Event & Public Space Management Module

- Built a complete module for public event and space booking with CRUD workflows and validation
- Implemented issue reporting features to allow citizens to log problems related to public infrastructure
- Integrated MongoDB collections with backend APIs for efficient data storage and retrieval
- Collaborated in an 8-member team using GitHub-based workflows for task assignments and code reviews

Technologies: React, Node.js, Express.js, MongoDB, Git/GitHub

Online Banking System (JSP & MySQL) | Aug 2023 – Dec 2023

- Developed loan application workflows including form submission, validation, and database persistence
- Implemented backend integration using Servlets and JDBC with MySQL database operations
- Improved reliability and maintainability by organizing pages and backend logic in a structured format

Technologies: JSP, Servlets, JDBC, MySQL, HTML, CSS

ChoonPan Mobile Application (React Native + Firebase) | Feb 2025 – Jun 2025

- Developed a delivery mobile application using React Native (Expo) with Firebase as backend services
- Integrated real-time updates for order handling and delivery progress synchronization
- Contributed to payment-related features and UI enhancements for improved usability

Technologies: React Native (Expo), Firebase, JavaScript

Task Manager Android Application (Kotlin + SQLite) | Mar 2023 – Jun 2023

- Built a task management Android application with add/edit/delete task functionalities
- Used SQLite for persistent storage and RecyclerView for optimized list performance
- Designed a simple and user-friendly interface with smooth navigation flows

Technologies: Kotlin, Android Studio, SQLite, RecyclerView

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology – Undergraduate

St. Mary's College, Kegalle

Secondary Education

EXTRACURRICULAR ACTIVITIES

- Member of the school cricket team at St. Mary's College, Kegalle (Opening Bowler)
- Participated in school athletics events (track and field)
- Participated in school badminton events

LANGUAGES

- Sinhala – Fluent
- English – Fluent

ADDITIONAL INFORMATION

- Interested in full-stack software development and mobile app development
- Comfortable working in collaborative team environments and delivering modules on schedule
- Strong willingness to learn new frameworks, tools, and development practices
